

Powering the Financial Future of Utilities

FINANCIAL SERVICES

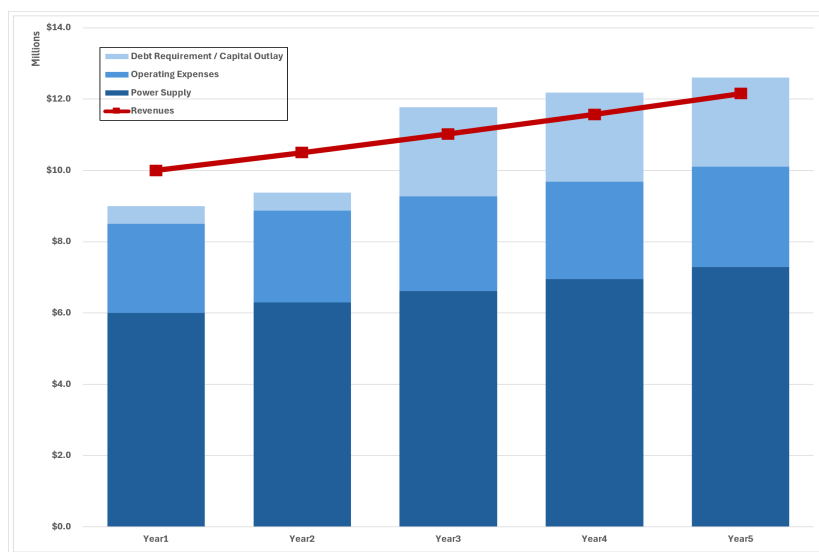

Our team delivers a comprehensive range of financial advisory services tailored to the utility industry, including power supply and transmission planning, cost-of-service and rate design, financial forecasting, load management, cost-benefit analysis, plant valuation, and regulatory compliance.

As the energy landscape evolves, we also support clients navigating emerging challenges and opportunities such as battery energy storage, electric vehicle adoption, renewable integration, and high-growth demand sectors like data centers.

By combining deep financial expertise with in-house engineering capabilities, Booth & Associates provides integrated solutions to help utilities, municipalities, and cooperatives make informed, forward-looking decisions in an increasingly complex environment.
